Education

Sep 2018 | Feb 2020	**MSc in Computing (Advanced Software Development)**, *Dublin Institute of Technology*, *Dublin, Ireland.*
Sep 2013 | May 2017	**BSc in Computing (Games Design & Development)**, *LIT*, *Tipperary, Ireland.*

Work Experience

March 2020 – Present — **Web Developer**, *Self Employed*, Suffolk, England.
- I create websites for various small to medium sized businesses.
- I work directly with clients to ascertain their requirements.
- Depending on the website complexity, I use pure HTML5, CSS3 and JavaScript or the WordPress website builder Oxygen with WooCommerce.

June 2017 – June 2018 — **Graduate Engineer**, *Openet*, Dublin, Ireland.
- As a graduate engineer, I was tasked with building my knowledge of the code base for a variety of products within Openet.
- Once familiar, I started to take on my own tasks given to me by the team lead, initially starting with small bug fixes and then moving on to full feature implementation (with Java and C++).
- Worked in an agile project management environment, this was a great introduction into the workflow of a professional software development company.
